Dear Professor Wang,

I am pleased to invite you to make a collaboration visit to our institute and a field sampling in the Var and the Pyrenees (France and Spain) for approximately 2 weeks between August 5 and 19, 2019.

The main purpose of this visit is to work on Hercynian granites of the Maures pluton (le Var, France), the Quérigut pluton (les Pyrénées, France), and the Maladeta pluton (les Pyrénées, Spain). This will help us to understand Hercynian orogenic system, caused by the continental collision between the Euramerican and the Gondwanan plates. Your expertise in granite petrology will play an important role in this work. I am happy to know that all expenses of your trip (travel, car rental, lodging and medical insurance) will be covered under the fund from your Project No. 41372065 (National Natural Science Foundation of China).

I am looking forward to continuing our collaborative research and taking a trip to the field during your visit.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'zheng', with a long horizontal stroke extending to the right.
