

To Prof. Anatoly Belonoshko
Nanjing University

Please consider this letter as an invitation for you to visit the HSE University in Moscow, Russia from 8th to 30th November. Your visit would allow us to finalize the joint article for the Physical Review B journal and organize a local seminar on the topics of atomistic computational modeling of materials in extreme conditions. In particular, we would be happy to hear your presentation on “A Comparison of Experimental and Ab Initio Structural Data on Fe under Extreme Conditions”, which is perfectly aligned with our research topics.

Grigory Smirnov, PhD,
Laboratory Head, Leading Research Fellow
International Laboratory for Supercomputer Atomistic Modelling and Multi-scale Analysis
National Research University Higher School of Economics
Moscow, Russia
